

SOLVE TO CREATE SNOW BUDDIES

The image displays a collection of educational materials for a winter-themed activity. In the foreground, two snowman cutouts are shown, one with a pink bow and green scarf, and another with a blue hat and red scarf. Behind them are several task cards with math problems. One card features a word problem: "A school is having a snow day. The fourth graders made 453 snowballs, the first graders made 218 snowballs, and the second and third graders combined made 218 snowballs. How many more snowballs did the first graders make than the fourth graders?" Another card shows a math grid with the title "SAVE THE SNOW BUDDY (MATH MATING)" and a table of numbers.

HAT WITH DECORATIVE BAND | ON COLORED PAPER

DIRECTIONS

ALL THE INFO:

Students solve a word problem to receive a piece of a snowman. Each word problem shows what piece they are earning. They must solve the problem correctly to earn that piece. Students solve all six word problems. Students assemble their

AMY OLIVIA

ALL THE INFO:

There are three different sets of word problems. There is also an editable set so that you can create your own word problems.

ALL THE INFO:

AMY OLIVIA

ALL THE INFO:

Print all of the snowman pieces ahead of time. These can be printed on white paper. If the pieces are printed on white paper, students can keep all of the pieces at his/her table as they solve a problem they bring it to the teacher. The teacher checks for a piece (if it is solved correctly). Another option would be to use folders. Students take out a piece once they have solved

to the outside of the envelope. Put the word problem inside of the folder. Put the folders around the room. Students work in groups and visit each task folder. Once they get to a folder students take out the word problem to solve

AMY OLIVIA

ALL THE INFO:

Students can solve their work on the recording sheet.

There are large and small word problems.
